Performance History

Objective

To benchmark the large-sized U.S. securities by excluding the Wilshire US Small-Cap and Wilshire US Micro-Cap securities from the Wilshire 5000 Total Market Index, the most pure and complete measure of the U.S. equity market.

Key Features

- The index is a subset of the Wilshire 5000 Total Market Index.
- Includes all securities larger than the 750th largest stock in the Wilshire 5000 by market cap as of the March and September semi-annual rebalance.
- Buffers are used to reduce index turnover.
- Bulletin-board and thinly traded issues are excluded generally because they do not have readily available prices.
- Weighted by float-adjusted market capitalization.

The Wilshire IndexesSM are calculated and distributed by Wilshire Associates Incorporated ("Wilshire"). It is not possible to invest directly in an index. Exposure to an asset class represented by an index may be available through investable instruments derived from that index. Wilshire makes no representations regarding the advisability of investing in investment products based on the Wilshire Indexes not sponsored, endorsed, sold or promoted by Wilshire. Index returns do not reflect payment of certain sales charges or fees an investor may pay to purchase the securities underlying the Index or investment vehicles intended to track the performance of the Index. The imposition of these fees and charges would cause actual performance of the securities/vehicles to be lower than the Index performance shown. Inclusion of a company in the Wilshire Indexes does not in any way reflect an opinion of Wilshire on the investment merits of the company.
